## DOSING EQUIPMENT

### Shark floating dispenser

Allows easy dosage of pool chemicals. Made of high impact polystyrene. It has a capacity for 5 tablets of 200 grs.

Code	Standard Packaging	Standard Weight kg	Standard Volume m <sup>3</sup>
36620	1	-	-

### Floating dispenser

Original floating dispenser ideal for residential and above ground pools. Adjustable chlorine supply. It also allows easy control of chemical product remaining in the dispenser, thanks to an original floating signal system. For a quantity of 1 kg in tablets.

Elite

This product is part of the AP Signature range.  
 A bubble detector, flow switch and compact probe holder as standard.  
 High quality electrodes with a 15,000 hour useful life under laboratory conditions and from 4,000 to 7,000 hours under normal conditions.  
 The Salt levels are controlled through a powerful system of salinity alarms that have different indicators for high and low salt levels.  
 An automatic system that prevents the formation of deposits in the electrolysis cell - user programmable from the control panel.  
 Production control 0 - 100% (11 current levels).  
 Complete and automatic control over water treatment, when pH and chlorine control are added to the benefits of the salt chlorinator.  
 Dosing pumps not included.

## SALT ELECTROLYSIS & pH CONTROL

### Smart

Basic equipment in the range with the possibility of adapting two external controls: Redox/cover detector control.

Mass-produced equipment with a bubble detector.

Electrodes have a lifetime of 10,000 hours under laboratory conditions, whilst under normal conditions their expected lifetime is 3,000-5,000 hours.

Salinity alarm: thanks to a shared LED it shows when there is too much or not enough salt in the water.

Polarity inversion regulation current. It has an automatic system that prevents the formation of scale on the electrolysis cells – programmable 2/3 hours.

Production control. Five production control levels from 0 to 100%.

Recommended: control pH levels using 36002-36004 machines.

### Smart +

Middle-of-the-range equipment. External controls can be adapted: redox, cover and flow switch included.

Mass-produced equipment with a bubble detector, flow detector and a 50-1/2 connection collar.

Equipped with high quality electrodes with a lifetime of 15,000 hours under laboratory conditions, and 4,000-7,000 hours under normal conditions.

Salinity alarm: has different LED indicators for HIGH and LOW salinity. It shows the salt levels needed.

Polarity inversion regulation current. It has an automatic system that prevents the formation of scale on the electrolysis cells – can be programmed by users from the control panel.

Production control. Eleven production control levels. From 0 to 100%.

Recommended: control pH levels using 36002-36004 machines.

### Smart + pH

New

Middle-of-the-range equipment. External controls can be adapted: redox, cover and flow switch included.

Bubble and flow detector, compact electrode holder for pH sensor, injection point of pH minus and flowmeter.

Equipped with high quality electrodes with a lifetime of 15,000 hours under laboratory conditions, and 4,000-7,000 hours under normal conditions.

Salinity alarm: has different LED indicators for HIGH and LOW salinity. It shows the salt levels needed. Polarity inversion regulation current. It has an automatic system that prevents the formation of scale on the electrolysis cells – can be programmed by users from the control panel.

Production control. Eleven production control levels. From 0 to 100%.

Automatic control of pH included. pH dosing pump not included.

### Selwatch

New

Selwatch is the first regulator system that controls an electrolysis or dosing pump. Analyzes, adjusts and automatically maintains the proper chlorine level. Aimed at all pools, private or group, treated with chlorine. It also controls all the electrolysis, valves and dosing pump of the market. Through automation of water treatment, Selwatch ensures a perfectly water treated and easy maintenance. It works according to the needs of the pool. It also allows to preserve the environment of the pool.

Selwatch	54048	1	5.5	0.025

### Selwatch +

New

Selwatch + is a regulator of the rate of chlorine by colorimetry. Works by self-learning the parameters of the pool. Compact, meets in the same box Selwatch high-end electrolysis and regulator system. Selwatch + also has an earth device and a flow detector. Its titanium electrodes are self-cleaning glass and has a translucent electrolysis integrated instrument holder.

### Selwatch Platinum

New

Selwatch Platinum is the flagship model. It is the freedom of the user. It deals with the quality of your water even during your absence. It is a regulator of the rate of chlorine colorimetric, non-toxic reagent patented electrolysis up to 100 m<sup>3</sup> and colorimetric pH regulator without probe. This "3 in 1" automatically regulates the chlorine and pH of your pool, by colorimetry, as well as control and automatic correction of pH (using pH- or pH +) through Selwatch. It has an adjustable setpoint and a safe injection duration.

## SALT ELECTROLYSIS & pH CONTROL

### Control Basic

Small in size, it was designed to prevent siphoning. The product requires little maintenance and is easy to install and protected from the spraying of chemical products. The device automatically measures and checks pH/Redox. Use with Astral Sel and Astral Sel Basic is recommended. **Supplied without sensors or calibration solutions. Installation kit included.**

- Plastic container with IP-55 protection
- Backlit LCD display
- Self-calibration of electrodes
- Quality control of electrodes
- Dosing pause during alarms and notification by a blinking LED
- Proportional dosing
- Adjustable set point

## SALT ELECTROLYSIS FOR PUBLIC POOLS

### Salt Electrolysis for public pools

Salt water chlorinators for commercial pools are becoming popular because they are efficient, practical, safe and well priced. Our wide range of industrial electrolysis systems covers self-cleaning equipment of up to 600 grams/hour of Chlorine, which makes it possible to use saline electrolysis to treat the water at any public use facility.

**Main advantages:**

**Safety:** There is no need to store, handle or dose any chemical products and therefore it is a much safer system. The raw material stored is common salt.

**Savings:** The introduction of saline electrolysis systems can bring net savings in operating costs of around 50-60%, with respect to traditional systems

## UV AUTOMATIC DISINFECTION

AstralPool presents Heliox UV, a new automatic UVC light system, which guarantees double disinfection through a significant reduction in the amount of chloramines (bound chlorine) along with the neutralisation of bacteria, viruses and other microorganisms present in water by impeding their reproduction. The range comprises the Heliox UV LP model for private pools, the Heliox UV MP for public pools.

### The advantages of UV-C technology:

UV ray treatment systems are completely automatic, with very low maintenance and running costs. They also have considerable advantages over other systems:

- 100% of pool water is treated.
- The disinfected water is free of unpleasant smells and does not irritate the eyes, thanks to a drastic reduction in the amount of chloramines.
- They save money as fewer chemical products are required.
- They are environmentally friendly because:
  - Less fresh water is needed (daily water renewal is reduced).
  - Fewer waste by-products are formed, resulting in a reduction in subsequent water treatment.
  - The UV-C equipment does not add any chemical products to the water.

### Heliox-UV operation

UV-C disinfection is a local treatment (UV chamber), which takes place as the water in the pool circulates through the chamber that contains the UV-C lamps. The accurate delivery of radiation (W UV-C) and residence time in the system ensure the effective neutralisation of 99.9% of microorganisms, as well as the reduction of chloramines to safe levels (<0.6 ppm).

### Heliox UV MP for public pools

New

Heliox UV MP (medium pressure) systems are designed to be used in public pools. These lamps operate over a wide spectrum to cover the whole of the UV region (see graph), which makes possible the effective eradication of chloramines (<0.6 ppm) in the pool water and its efficient disinfection due to the neutralisation of microorganisms (99.9%), including those resistant to chlorine treatment.

#### New features

- More compact design (UV reactor in AISI-316).
- Adjustable to between 70 and 100% of rated power, in 1% increments, by means of a self-cooling electronic ballast.
- Fluidra technology (design and manufacture).
- Calibrated UV-C radiation sensor (mW/cm<sup>2</sup>). Precise dose control. Instant power adjustment to process conditions. Saves energy and extends the lamp's lifetime.
- Advanced colour touch screen. System menu for browsing process parameters and log files.
- Advanced versions: MODBUS communication and embedded web.

The control architecture used in Heliox UV PM systems has a number of features that make them reliable, energy-efficient and scalable to the highest possible level.

The Heliox UV MP systems use two parameters for adjusting the power setting: average radiation and flow. All models have a rated radiation profile that ensures a dose of 60mJ/cm<sup>2</sup>. If the flow is lower than the rated value, the same will apply to the required radiation level and the system reduces the power input, thus optimising power consumption and the lamp's lifetime. Likewise, if radiation drops due to losses caused by cloudy water, scaling or lamp emission efficiency, the system will adjust the power so that the right dose is supplied.

## UV AUTOMATIC DISINFECTION

AstraHeliox UV LP Inox and Heliox UV LP PE (LP = low pressure) systems are designed to be used in residential pools. They will enable you to benefit from the latest ultraviolet light technology in the field of water treatment.

### New features of LP Inox & LP PE:

- Stainless steel and polyethylene versions.
- Amalgam lamp version (LP30 and LP30+).
- Stainless steel power box.
- Fluidra technology (design and manufacturing).
- Lamp "ON" indicator.
- Electronic counter for working time and ignitions (lamp lifetime control).
- Flowswitch (optional, included in LP+versions).
- Versions with integrated pH&ORP control (integral solution).

### Heliox UV LP Inox for residential pools

### Exactus membrane dosing pumps

Electronic dosing pump for wall mounting or horizontal base. 6 models available:

- Analogical manual
- Microprocessor manual
- Proportional processor via mA external signal
- With incorporated pH instrument
- With incorporated Redox instrument.
- Volumetric (enquire Aquastral)

All systems comply with EC regulations. IP-65 protection. Electrical connection: 220/240 V 50/60 Hz. Materials in contact with the liquid: Polypropylene, Viton, Teflon and PVC. Other valve models in different materials available on request. Includes anti-acid plastic housing. Touch sensitive moisture resistant indicator. Drainage valve included. Lubrication-free, minimal maintenance. On request, the unit can be supplied with outlet, level probe or other operating voltages.

### Optima dosing pumps

The OPTIMA dosing pump represents the development of more than 30 years of experience in the automatic dosing field. This new series reduces the number of pumps required to meet the various dosing needs.

The OPTIMA dosing pump series, with its new power supply technology from 90, VCA to 265 VCA and at 50-60 Hz, ensures a precision and reliability never seen before.

Integration of many functions due to its simple programming, an alphanumeric display, the possibility of multilingual programming of the menu and a new technology which permit controlled flow rate and back pressure. Allows to use the same model for various applications providing a great versatility.

Systems produced according to EC standards, IP65 protection, 90-265 VCA 50/60 Hz electrical power supply. Materials in contact with the chemical product are made of polypropylene, Viton, Teflon and PCV (other materials possible upon request). Anti-acid plastic container. Moisture-resistant membrane buttons. Built-in relief valve. No lubrication necessary, minimum maintenance. Peristaltic pump also available (see page 270).

### OPTIMA constant flow rate analog dosing pump

The flow rate can be set as a percentage using the potentiometer under the front panel, which modifies the pump's operation frequency. Disposes of a level sensor inlet.

**Double scale adjustment:** OPTIMA analog dosing pumps can divide the maximum dosing frequency by 5. This double scale allows the user to have two pumps with a single model.

## DOSING PUMPS

### OPTIMA proportional and volumetric digital dosing pump

OPTIMA pumps provide all the functions of proportional dosing in a single model.

**Features:**

- Proportional with analog signals 0/4...20mA
- Proportional with digital signals and the possibility of:
  - Multiplying the input impulses (1:n)
  - Dividing the input impulses (n:1)
  - Function in ppm
- The pump has a memory function for processing input impulses dosing
- Level alarm with pump disconnection.
- Maximum dosing flow rate to prevent overdosing.
- Password for protecting programmed data
- Possibility of alarm connection.
- 90-265 VAC 50/60 Hz power supply.

### OPTIMA dosing pump with pH / Redox analyzer

OPTIMA dosing pump with built-in pH/Redox control. pH/Redox instrument. Automatic calibration: Calibration by simply pressing a button, with the possibility of controlling the level of probe efficiency

**Features:**

- 90-265 VAC 50/60 Hz power supply
- Manual compensation of temperature for pH or automatic compensation with PT100.
- 4...20mA output for printed register or transmission of the reading.
- Level alarm with pump disconnection.
- Set point deviation alarm, programmable for the entire measurement range.
- O.F.A. time (Over Feed Alarm) to prevent dosing if any probe malfunctions.
- Maximum dosing flow rate to prevent overdosing.
- Password for protecting programmed data.
- Possibility of alarm connection.

### Definition:

- Organic Chlorine (stabilised Chlorine):** This term is used to indicate pools treated with trichlor tablets, granular Dichor etc. – in other words, pools that use an Isocyanuric acid organic compound.
- Inorganic Chlorine (un-stabilised Chlorine):** This term is used to indicate pools treated with either Sodium or Calcium Hypochlorite.
- Organic Bromine:** This term is used to indicate pools treated with Dimethylhydantoin Bromine (in tablets).

### Rolachem RC8 Series - Automatic Acid (pH) & Chlorine (ORP)

The RolaChem RC8 is a proportional dosing pH and ORP controller. New pH and ORP sensors have integral amplifiers and high level shielding to virtually eliminate interference. Easy to calibrate and easy to operate with large 4 line LCD display to guide installers and users through set up and operation. Integral peristaltic pumps from 1 RPM to 100 RPM for all size swimming pools and ABS case. Software easily adjusts dosing rates for bather load and weather conditions. Available in ORP only, pH only and ORP and pH control. 3 Year Pro rata warranty.

### Pool Patrol

New

The Colorimetric controller unit gives a reply to the demand of the Swimming Pool Market requiring compact, easy and low maintenance device, with IP65 enclosure. The available measures are: Free Chlorine (DPD1), pH, Redox (ORP), Temperature. Thanks to its internal graphic display it is possible to have all measures displayed at the same time. The Plastic Cover assures an easy accessibility to the hydraulic part. Includes: Measuring instrument, flow detector by temperature, pH sensor, ORP sensor, pH calibration solutions, ORP calibration solutions and DPD2 bottle.

## AUTOMATIC REGULATION AND CONTROL EQUIPMENT

### Controller

New

Automatic pH, Redox and free Chlorine regulation equipment.

- 8 x 12 mm Standard connections.
- Air vent purge at the entrance.
- 80 micron filter integrated.
- New reed flow proximity sensor, avoiding overdoses when the flow decreases.
- Integrated support for sensors.
- Adjustable flow valve and valve for water samples.
- 4-20 mA outlet for external registration.
- Adjustable frequency output 0-120 imp/min.
- Automatic temperatura compensation.

#### Controller pH/Redox/serial Port

Includes:

- pH + Redox electrodes + Temperature sensor (PT100)
- Buffer solutions kit

Does not include dosing pump nor electric valve for tablets dosage.

## DOMOTICPOOL

### Domoticpool

Control Unit with Finger touch screen

Easily understandable Icon and menu presentation

Communication Module

With the centralized Domoticpool electronic panel, monitoring and controlling the poolside equipment (lighting, filtration, garden watering, pool cleaning, etc.) is achieved installed inside of the residence without laying out any wires. For obtaining this, a Control Unit located in the house communicates with the Communication Module situated in the Plant Room. This is achieved using the conventional electric network of the house as order transmitter.

It consist of:

- Two way communication using the power lines.
- Graphic display with finger touch screen.
- True time clock permitting programmed temporising cycles.
- Personalized communication protocol.
- Two way transmission.

Easy installation and cost reduction has to be highlighted as it eliminates cable laying, thus enabling its control from anywhere, where we have access to electric network. Electric terminals can be easily added both in existing pools as well as in new ones. Communication module has 3 relays with inlets/outlets and 2 temperature sensors inlets.
